

ZipFlat launched at the 2011 DSEi Show

Published on Friday, 09 September 2011 14:36 |

ZipFlat, a new concept for constructing buildings such as emergency shelters and over head protection, is being launched in the UK at the **2011 DSEi show**.

ZipFlat are proudly sharing stand **S10-106** with LINE-X Protective Coatings, who are showcasing their range of spray-on blast and spall protection.

ZipFlat's innovative concept has already sparked interest within the UK, by being picked as one of six finalists in the **2011 DSEi Technology Challenge**. We look forward to hearing the final results after we present ZipFlat at the DSEi Show on **Thursday 15th September 2011**
